

One Freedom Bed Saves \$ 800,000

The Freedom Bed reduces and/or eliminates "loss cost" associated with Work Comp related claims for lifting and/or turning patients.

ASSUMPTIONS:

1. Investment in Freedom Bed @ \$33,000
2. Reducing and/or eliminating the need for Night-time attendant for 365 days/year: = \$ 40,000 + 2% per year inflation"
3. Prevents 1-bed sore every 3-years, 33% reduction of \$75,000 for an average of \$25,000 saved annually + 2% per year inflation.
4. Prevents 1-incidence of pneumonia every 4-years, 25% reduction of \$45,000 for an average of \$ 11,250 saved annually + 2% per year inflation."
5. Anticipated useful life of Freedom Bed, greater than 10-years"

INDICATIONS:

*** Lateral rotation therapy is indicated for use on patients with SCI, TBI, STROKE, ALS, MS, MD and other immobilizing injuries or diseases.

OTHER INCALCULABLE PATIENT BENEFITS

1. Significantly improved comfort -- triple laminated and medical grade foam mattress
2. Greater privacy -- greater independence from caregivers -- better sleep quality
3. Automation allows more frequent turning -- less handling -- less pain -- body rotation in perfect alignment
4. Reduction and/or elimination of gastro-esophageal reflux -- elevation of head section to 30 degrees
5. Reduction and/or elimination of pneumonia -- rotation shifts fluids, keeping lungs clear
6. Reduction and/or elimination of bedsores -- rotation provides pressure relief, maintaining intact skin
7. Reduction and/or elimination of spasticity and abnormal tone -- body rotation in perfect alignment
8. Improved bowel regularity -- and kidney function
9. Promotes Hydration (reduces dehydration and electrolyte imbalance caused by heat producing systems)
